

Part Finder Installation Guide

Installation Guide with picture

1. Copy paste file in corresponding folder app/code/local/

Name	Size	Type	Modified
etc	233 bytes	Folder	
design	2.5 kB	Folder	
code	61.5 kB	Folder	

2. Flush the cache

The screenshot shows the Magento Admin interface. At the top, there are navigation tabs: Dashboard, Sales, Catalog, Customers, Promotions, Newsletter, CMS, Reports, System, and The Commerce Shop. Below the tabs, there are three warning messages:

- One or more of the Cache Types are invalidated: Layouts, Blocks HTML output. Click here to go to [Cache Manager](#)
- Important: Formkey validation on checkout disabled. This may expose security risks. We strongly recommend to Enable
- Latest Message: Magento Commerce 1.9.4.0 adds PHP 7.2 support along with security enhancements – 11/28/2018 [Read More](#)

The main content area is titled "Cache Storage Management". Below the title, there are several action links: [Select All](#), [Unselect All](#), [Select Visible](#), [Unselect Visible](#), and [8 items selected](#). A table lists the cache types:

Cache Type	Description
<input checked="" type="checkbox"/> Configuration	System(config.xml, local.xml) and modules configuration files(config.xml).
<input checked="" type="checkbox"/> Layouts	Layout building instructions.
<input checked="" type="checkbox"/> Blocks HTML output	Page blocks HTML.
<input checked="" type="checkbox"/> Translations	Translation files.
<input checked="" type="checkbox"/> Collections Data	Collection data files.
<input checked="" type="checkbox"/> EAV types and attributes	Entity types declaration cache.

On the right side, there is a navigation menu with the following items: My Account, Notifications, Tools, Web Services, Design, Import/Export, Manage Currency, Transactional Emails, Custom Variables, Permissions, Magento Connect, Cache Management, Index Management, and Manage Stores. A red arrow points to the "Cache Management" link in this menu.

The screenshot shows the Magento 2 admin interface. At the top, there is a navigation bar with tabs for 'Reports', 'System', and 'The Commerce Shop'. Below this, a sidebar menu is visible with 'Cache Management' highlighted. The main content area displays a table of cache tags with their associated tags and status. There are also buttons for 'Flush Magento Cache' and 'Flush Cache Storage'.

Associated Tags	Status
CONFIG	ENABLED
LAYOUT_GENERAL_CACHE_TAG	INVALIDATED
BLOCK_HTML	INVALIDATED
TRANSLATE	ENABLED
COLLECTION_DATA	ENABLED
EAV	ENABLED
CONFIG_API	ENABLED
CONFIG_API2	ENABLED

3. You can see a menu called: **The Commerce Shop**

This screenshot shows a close-up of the navigation bar at the top of the Magento 2 admin interface. The tabs are 'CMS', 'Reports', 'System', and 'The Commerce Shop'. The 'The Commerce Shop' tab is highlighted in orange. Below the navigation bar, there is a message that says 'to go to [Cache Management](#) and refresh cache types.'

4. New filters can be created to show the part finder where ever you want. Select the number of dropdowns needed and fill the form.

If “Attribute Mapping” is selected, then based on selected attributed, the number of dropdowns will be automatically displayed. **(See the points from #8)**

Filter	
General	

Add Filter	
General	
Name	test
No of Dropdowns	2
Attribute Mapping	Disable

4. Set the Droddrop name(attribute mapping disabled)

Filter	
General	
Dropdowns	
Import	
Products	
Filter Code	

Edit Filter 'test'	
Dropdowns #1	
Name	dp1
Dropdowns #2	
Name	dp2

5. Add the products with combination

Add Product

Products	
dp1	<input type="text" value="shoes"/>
dp2	<input type="text" value="black"/>
SKU	<input type="text" value="13"/>

6. Product tab listing (you can also use import tab to import the product. column count should match the product list column count) eg if you 2 dropdowns, you should import 3 column CSV file (i.e dropdown1 value,dropdown2 value and sku)

Edit Filter 'test' Back Reset Delete Item Save

Manage Products

Page 1 of 1 pages | View 20 per page | Total 1 records found Export to: CSV Export

Select All | Unselect All | Select Visible | Unselect Visible | 0 items selected

ID	dp1	dp2	SKU
Any	From: <input type="text"/>	<input type="text"/>	<input type="text"/>
	To: <input type="text"/>	<input type="text"/>	<input type="text"/>
<input type="checkbox"/>	3 men	top	12

7. Copy the embedded code generated and paste based on your requirement

Edit Filter 'test' Back Reset

Get the Code

code

```
{{block type="partfinder/form" id="21"}}
```

This content is for CMS Page

code

```
<reference name="content"><block type="partfinder/index" before="-"> <action method="setId" ><id>21</id></action></block></reference>
```

This content is for BLOCK Page

8. Product finder with Attribute Mapping Enabled:

Edit Filter 'Robocop'

Dropdowns #1

Name	<input type="text" value="Man"/>
Attribute	<input type="text" value="Year"/>

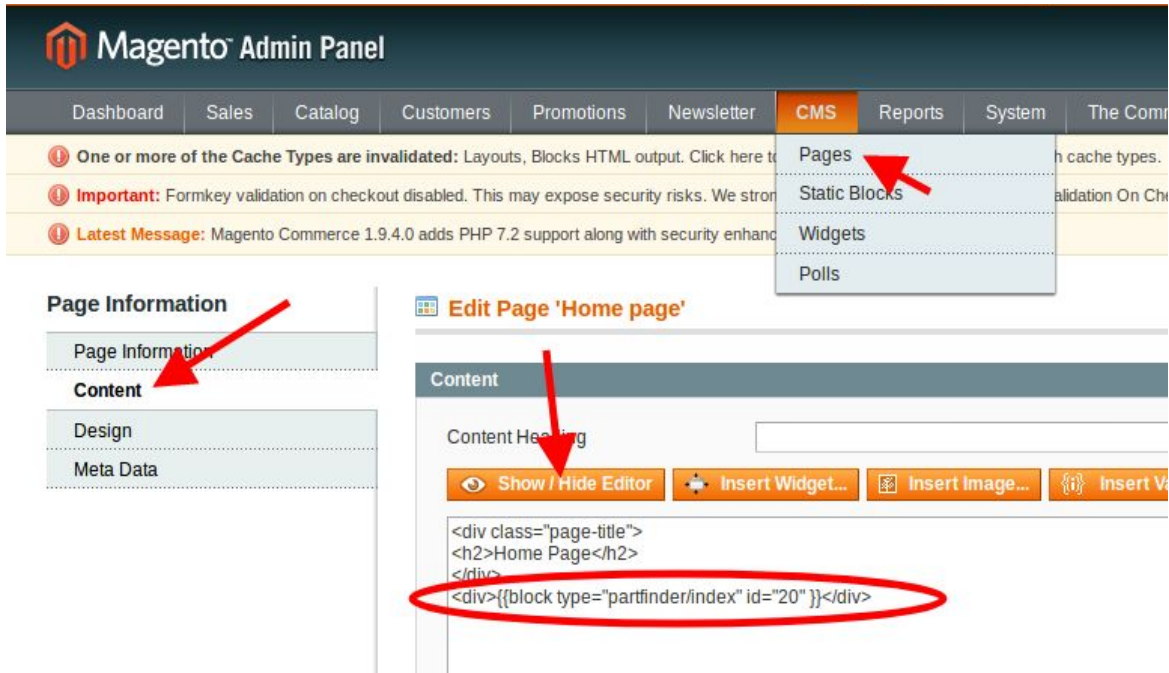

Dropdowns #2

Name	<input type="text" value="Machine"/>
Attribute	<input type="text" value="make"/>

Where I Paste the code ...?

In menu Catalog->Manage Categories ->sample (select category)->Custom design->Custom layout

The screenshot shows the Magento Admin interface. The top navigation bar includes 'Dashboard', 'Sales', 'Catalog', 'Customers', 'Promotions', 'Newsletter', 'CMS', 'Reports', 'System', and 'The Commerce S'. The 'Catalog' menu is open, showing options like 'Manage Products', 'Manage Categories', 'Attributes', 'URL Rewrite Management', 'Search Terms', 'Reviews and Ratings', 'Tags', and 'Google Sitemap'. A red arrow points to 'Manage Categories'. On the left sidebar, under 'Categories', there are buttons for 'Add Root Category' and 'Add Subcategory', and a tree view showing 'Default Category (0)' and 'sample (2)'. A red arrow points to 'sample (2)'. Below the sidebar, there are tabs for 'General Information', 'Display Settings', 'Custom Design', and 'Category Products'. The 'Custom Design' tab is active, showing a form with fields for 'Use Parent Category Settings', 'Apply To Products', 'Custom Design', 'Active From', 'Active To', 'Page Layout', and 'Custom Layout Update'. The 'Custom Layout Update' field contains XML code:

```
<reference name="content">
<block type="partfinder/index" before="-">
<action method="setid" ><id>16</id></action>
</block>
</reference>
```

 This code is circled in red.
