

Quick Order Installation Guide

Installation Guide with picture

1. Copy paste file in corresponding folder app/code/

2. Run the below code in terminal.
 - `php bin/magento module:enable TheCommerceshop_QuickOrder`
 - `php bin/magento setup:upgrade.`
 - `php bin/magento setup:static-content:deploy`
 - `php magento cache:flush`
3. You can see a module in store->configuration.

The screenshot shows the Magento 2 Configuration interface. At the top, a yellow banner displays a warning: "One or more integrations have been reset because of a change to their xml configs." and "System Messages: 2". The main header includes "Configuration", a search icon, a notification bell with a red dot, and the user "admin". Below the header, the "Store View" is set to "Default Config", and a "Save Config" button is visible. The left sidebar contains a navigation menu with categories like DASHBOARD, SOLWIN, FREEGO THEME CPANEL, SALES, CATALOG, CUSTOMERS, MARKETING, CONTENT, REPORTS, STORES, SYSTEM, and SERVICES. The main content area is titled "THECOMMERCESHOP Quickorder" and features a scrollable selector on the left with options: GENERAL, SOLWIN, FREEGO, CATALOG, CUSTOMERS, SALES, DOTMAILER, and SERVICES. The right side of the configuration panel includes:

- An "Enable" dropdown menu set to "Yes".
- A "background color" text input field with a placeholder "Enter background color example: '#185f8e'".
- A "Text-color" text input field with a placeholder "Enter text color example: '#f1f1f1'".

Step 1: Select Quickorder->Enable option as Yes.

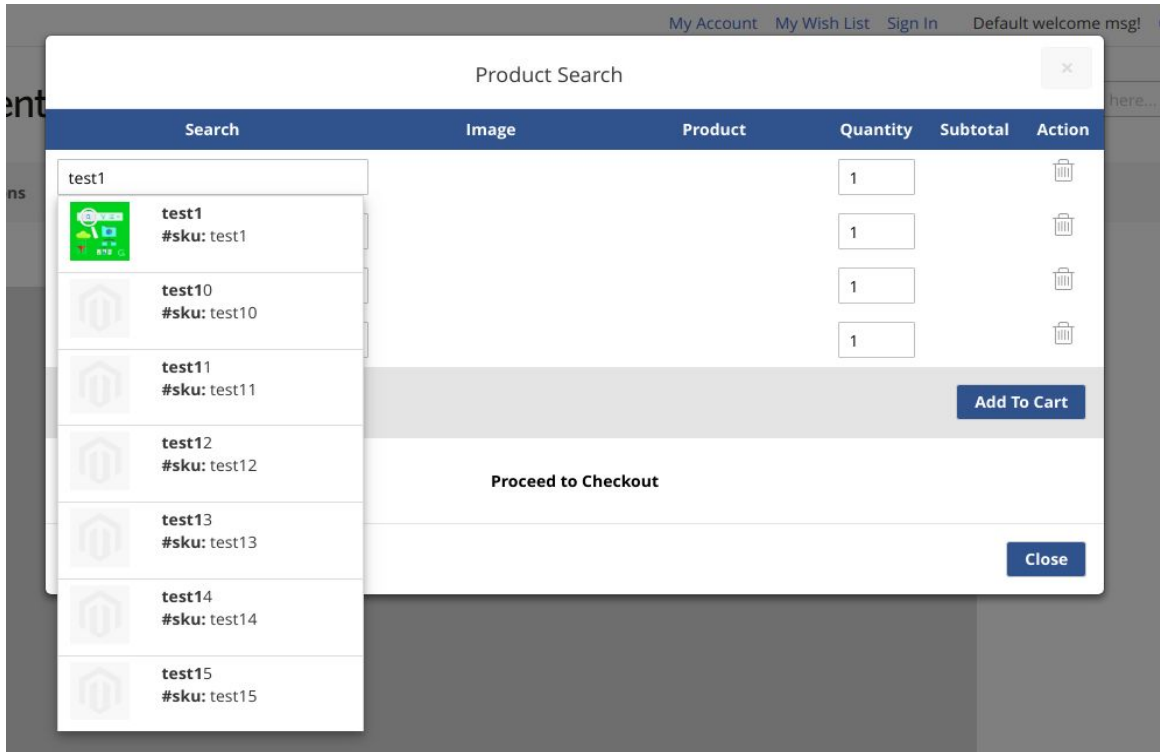

Step 2: Under scroll selector section

- **Background color:** Enter the color code for changing the background color.
- **Text color:** Enter the text color code for changing the text color.

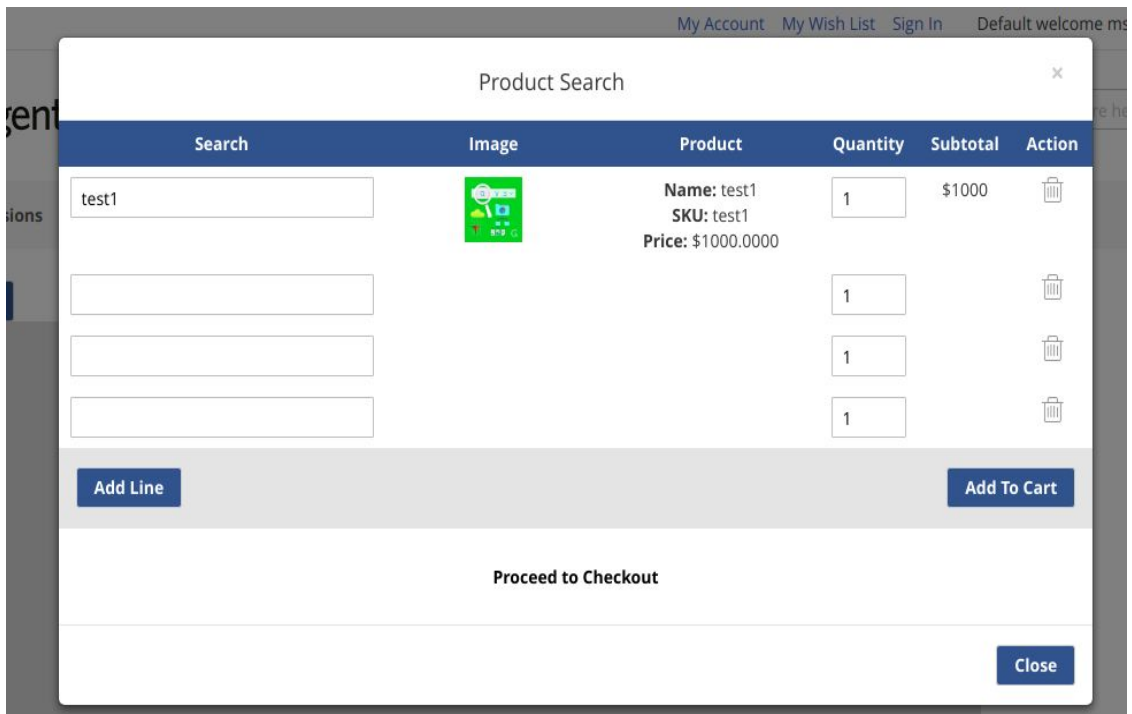

4. Flush the magento cache.

5.For Desktop responsive.

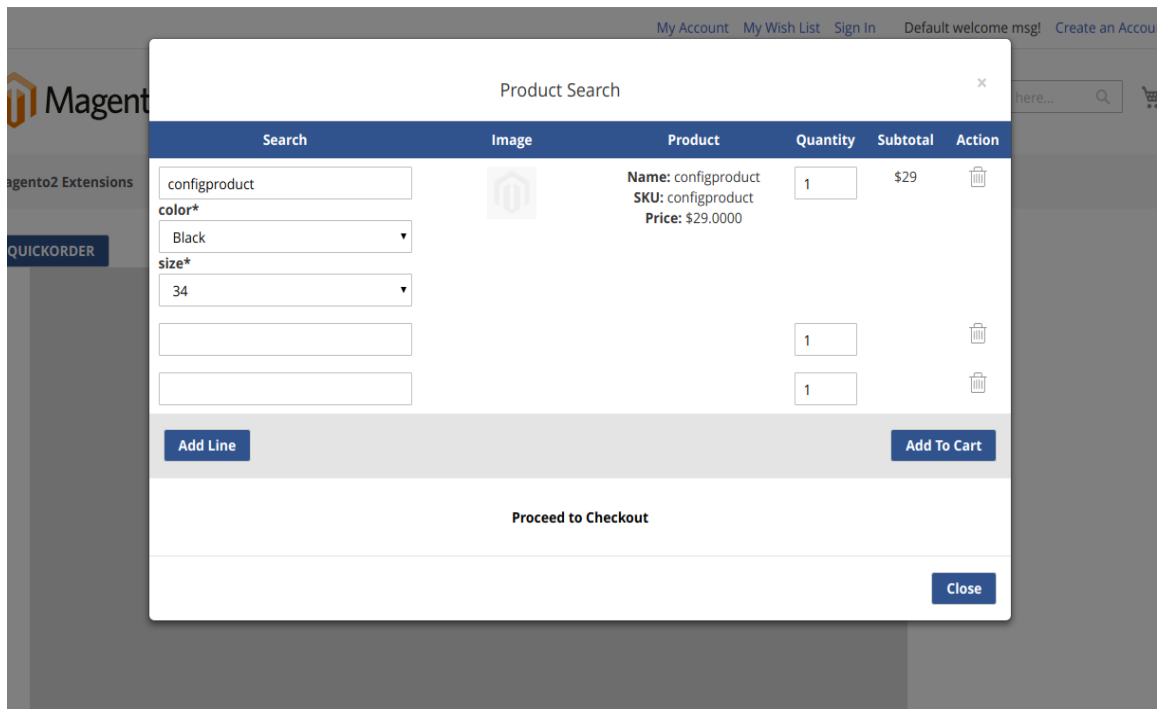

- Click the Quick order button, pop will display like this.
- Enter the product name in the search tag and select any product from the dropdown.

- When selecting the simple product.

- When selecting the configurable product, the attribute will displayed. By choosing the attribute, requesting product will append.

6.Quick order for mobile responsive.

For mobile, Quick order button will redirect to new page and the functionality are same like desktop.

Search	Product	Qty	total	Action
<input type="text"/>		1
